Authors : Butarin, N. S.; Yas'kov; Miletskiy, D. M.; and Bagrovskaya, N. M.

Title : Experiments in fattening medium-type hybrids from wild boars and domestic sows on a non-concentrated type of feed

Periodical : Vest. AN Kaz. SSR, 11/2, 61-66, Feb 1954

Abstract : The belief in the use of concentrated feed in fattening hogs is held to be erroneous and extensive data are collected from experimentation with different kinds of hybrids and different kinds of feed. An analysis of these data shows that even more pork is produced with the less concentrated feed at a great saving of outlay. Ten Russian references (1943-1951). Tables.

BULGARIA / Chemical Technology, Chemical Products and Their Application, Part 3. - Drugs, Vitamins, Antibiotics. H-17

Abs Jour : Ref Zhur - Khim., No 14, 1958, No 47786

Author : Iv. Isaev, Mikh. Milev, Evg. Minkov.
Inst : -
Title : Upon The Adsorption Amount of Extracting Agent at Preparation of Aquoous Tinctures and Decoctions.

Orig Pub : Farmatsiya (B'lg.), 1957, 7, No.3, 23 - 32.

Abstract : It was established that at the preparation of tinctures and decoctions a part of the extracting agent (water) is adsorbed on the vegetable material. It is proposed for a more complete extraction of medicinal substances to pour considerably more water into the vegetable material than it is prescribed. The amount of water necessary for the preparation of tinctures and decoctions of primrose and valerian roots, cinchona bark, adonis grass, bearberry and foxglove is shown.

"Use of Local Perfusion of the Lower Extremities"

Sofia, Voenno Meditsinsko Delo, Vol 21, No 3, Jun 66, pp 20-23

Abstract: Experiments carried out on dogs with ischemia of a hind leg indicated that the effects of acute ischemia could be counteracted by local perfusion of the isolated leg with oxygenated, heparinized blood provided that the perfusion was carried out no later than 24 hrs after the ischemia had been produced. A necessary condition for the success of the treatment was preliminary perfusion with a physiological salt solution to remove toxic products of tissue decay; unless this was done, the dogs died. Restoration of blood circulation by this method in cases of complete ischemia may prevent gangrene and elimate the necessity of an amputation. Five references (2 Bulgarian, 1 USSR, 2 Western). Manuscript received 10 Apr 66. Russian summary.
